How to use this guide

Use the files from the brand kit (`/brand`) — never redraw the logo. When in doubt, choose the simpler option: the Λ mark, the Bold Red accent and plenty of space. The live website, the Control Center and all documents follow these rules.

01 · BRAND ESSENCE

Who UzLeeder is

Name

UzLeeder — written as one word, capital U and L. “Uz” for Uzbekistan, “Leeder” for leaders.

Slogan

FOR LEADERS

Positioning

Engineering products for the AI era.

Websites, business portals and AI automation for your business. Based in Uzbekistan — available for projects worldwide.

Four layers

- **Max** — Founder & CEO, the human decision-maker.
- **UzLeeder** — the brand and engineering business.
- **AI Engineering** — the AI-assisted method: Understand → Architect → Direct AI → Generate → Review → Test → Ship.
- **Control Center** — the private system that runs the business.

Brand philosophy

SALAAM

NEW ERA

UzLeeder entering the new era of building with intelligence. Used once, intentionally — never as decoration.

Principle

AI assists. Max directs. Max validates.

02 · LOGO

Primary logo

UzLeeder
FOR LEADERS

Lockup

The Λ mark + the wordmark **UzLeeder** + the slogan FOR LEADERS. This is the primary logo for the website header, documents and presentations.

The Λ mark

A peak — leadership and direction — drawn as two strokes: the red outer Λ and the inner chevron. Used alone for the favicon, app icon, cursor, avatars and small spaces.

Mark on light · lockup on dark · app icon

03 · LOGO

Construction & clear space

Geometry (48 × 44 grid)

- Outer Λ: points (4,41) → (24,5) → (44,41), stroke **7**, miter joins.
- Inner chevron: (14,41) → (24,23) → (34,41), stroke **5.5**.
- Both strokes share the same base line; the inner peak sits exactly half-way.
- Colours: outer **Brand Red**; inner **Ink Navy** on light, **White** on dark.

Clear space

Keep empty space around the logo equal to the height of the inner chevron (≈ 40% of the mark height). No text, edges or images inside it.

Minimum size

Λ mark: 16 px / 5 mm. Full lockup: 120 px / 32 mm wide. Below that, use the mark alone.

The dashed line marks the minimum clear space.

04 · LOGO

Logo versions

Colour on light
Default for paper, light theme, documents.

Colour on dark
Website dark theme, intro, social.

White
On photos, video and coloured backgrounds.

One colour (ink)
Fax, engraving, one-colour print.

White on red
Only on Brand Red surfaces.

App icon
Rounded ink tile — favicon, home screen, avatar.

Latin always, left to right

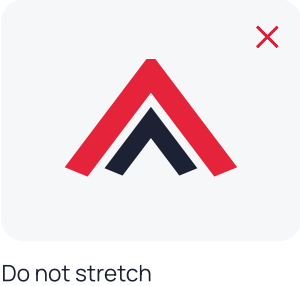

The wordmark is never translated or transliterated. On Persian and Arabic pages the logo stays Latin and left-to-right.

05 · LOGO

Logo misuse

Do not rotate

Do not stretch

Do not recolour

No shadows or effects

Do not change stroke weights

Do not swap the colours

No busy backgrounds

No crown — it is retired

06 · EMBLEM

Official emblem

What it is

The round seal of UzLeeder: ink-navy disc, red rim and dotted ring, the Λ peak with a white summit, “UZLEEDER” on top, “·FOR·LEADERS·” below and “EST. 2026”.

Where it is used

- The UzLeeder brand section of the website (the ring rotates slowly; the centre stays still).
- The footer (stamp style, follows the theme).
- Official moments: certificates, awards, social cover images.

Rules

- ✕ Not a replacement for the logo in the header.
- ✕ Never crop the ring text or change “EST. 2026”.
- ✕ Minimum size 18 mm / 64 px so the lettering stays readable.

07 · STAMP

Document stamp

The stamp edition

The emblem without the disc — one ink colour (Red · light theme) with the inner Λ in Ink Navy, on a transparent background, so it prints like a real rubber stamp.

How to place it

- Bottom right of a document, next to the signature line.
- Rotated −8°, blend mode “multiply”, 30–36 mm wide.
- Only on documents issued by UzLeeder: certificates, service & pricing documents, contracts.

Honesty rule

The stamp marks a document as issued **by UzLeeder itself**. It is not third-party certification and must never be presented as one.

08 · COLOUR

Colour palette — Bold Red

	NAME	HEX	RGB	USE
	Brand Red	#E5243B	229, 36, 59	The logo colour. Λ mark, wordmark “Leeder”, favicon, documents.
	Red · dark theme	#F0384E	240, 56, 78	Accent on dark backgrounds: buttons, links, highlights, emblem.
	Red · light theme	#E01E37	224, 30, 55	Accent on light backgrounds and paper: documents, stamp.
	Light red	#FF5468	255, 84, 104	Small highlights on dark: kickers, numbers, hover states.
	Ink Navy	#1C2233	28, 34, 51	Inner Λ on light, emblem disc, wordmark “Uz” on paper.
	Deep Black	#07090D	7, 9, 13	Dark background, intro, signature section.
	Surface	#10141C	16, 20, 28	Cards and panels in the dark theme.
	Paper	#F6F7F9	246, 247, 249	Light theme background.
	White	#FFFFFF	255, 255, 255	Inner Λ on dark, text on red buttons.

Proportion

Mostly dark or paper, some ink — red only as the accent (≈5%). Red means “action” or “brand”.

Semantic tokens (code)

`--color-brand · --color-accent · --color-background · --color-surface · --color-text · --color-muted · --color-border · --color-success · --color-warning · --color-danger`

The website, the Control Center and the documents use the same tokens.

09 · COLOUR

Colour templates (Control Center)

Bold Red is the official identity. The Control Center → Design page can switch the **website** to one of these templates, or build a custom design part by part (colours, buttons, cards, corners, hero, menu, sections, spacing, headings). Each template has a dark and a light version and its own brand kit in `/brand`.

Bold Red
Official identity — the default
`#F0384E`

Navy + Gold
Premium, classic
`#C9A227`

Emerald
Calm, growth
`#10B981`

Royal Purple
Creative, AI
`#8B5CF6`

Ocean Blue
Trust, technology
`#3B82F6`

Sunset Orange
Energy, bold
`#F97316`

Monochrome
Minimal
`#F2F4F8`

Rule

Templates and custom designs change only the website. Official documents — certificates, the services document and contracts — always keep the original Bold Red identity.

10 · TYPOGRAPHY

Typography

DISPLAY · OUTFIT 700–800

Engineering products for the AI era.

BODY · MANROPE 400–700

Websites, business portals and AI automation for your business. We agree the scope, price and delivery plan before development begins.

LABELS · MONOSPACE (CASCADIA MONO / CONSOLAS), UPPERCASE, WIDE TRACKING

01 — SELECTED WORK · FOR LEADERS

PERSIAN & ARABIC · VAZIRMATN

ساخت محصول برای عصر AI — منتجات لعصر الذكاء الاصطناعي

Scale (web)

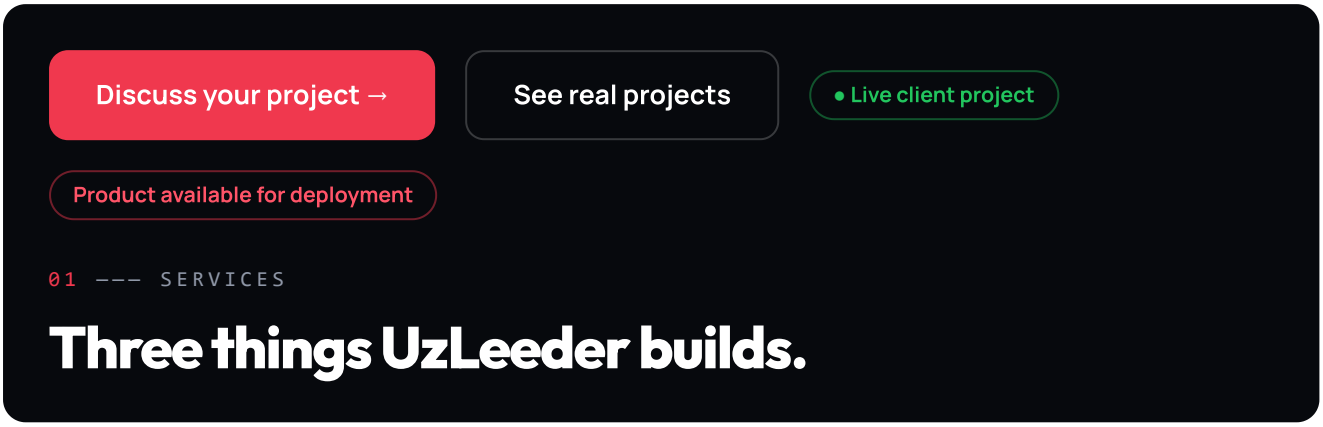

Hero 56–88 px · Section title 40–56 px · Card title 20–24 px · Body 16–18 px · Labels 11–12 px.

Rules

- Tight tracking on headlines (−2%), none on body text.
- No letter-spacing in Persian or Arabic — it breaks the joins.
- Uppercase only for short labels, never for paragraphs.

11 · INTERFACE

Interface elements

Buttons

Primary = red fill, white text, one per view. Secondary = outline. Radius 10 px.

Section kicker

Two-digit red number + thin line + uppercase label. Numbers follow the order on the page.

Status pills

Only honest statuses: Live client project · Product available for deployment · Demonstration · In development · Private project · Concept · Archived.

Cards

Surface colour, 1 px border, radius 14–18 px, no heavy shadows; lift 3 px on hover.

Cursor

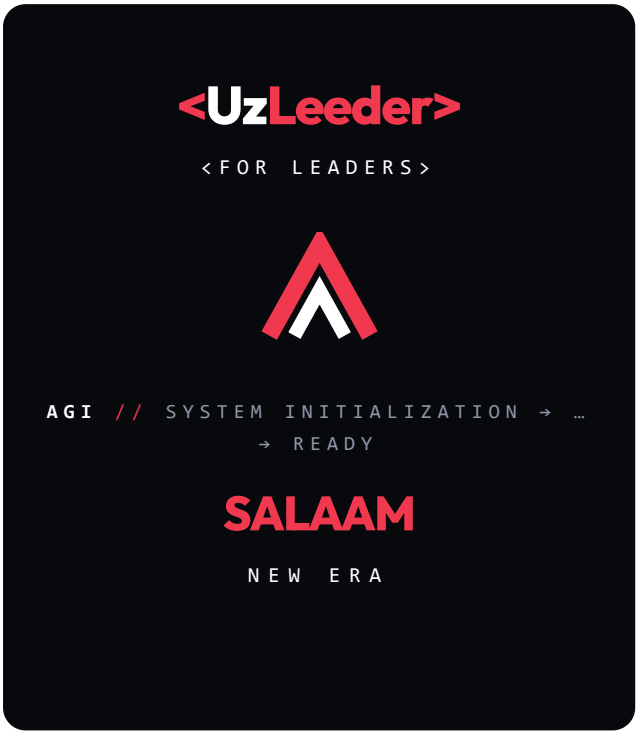

The Λ mark, tilted −28° like a system arrow (22 × 24 px). Colours swap on links.

Themes

Dark and light versions of every screen; the visitor's choice is remembered.

12 · MOTION

Motion & intro

The intro — locked

1. "<", then U·z·L·e·e·d·e·r letter by letter, then ">".
2. "<For leaders>" types in below.
3. The brackets fold into the Λ mark.
4. System initialization line (V5): "AGI //" + SYSTEM INITIALIZATION · LOADING UZLEEDER · CONNECTING SYSTEMS · HUMAN CONTROL · ON · READY, one segment of a five-part rail per state (no percentages).
5. SALAAM / NEW ERA — then the homepage.

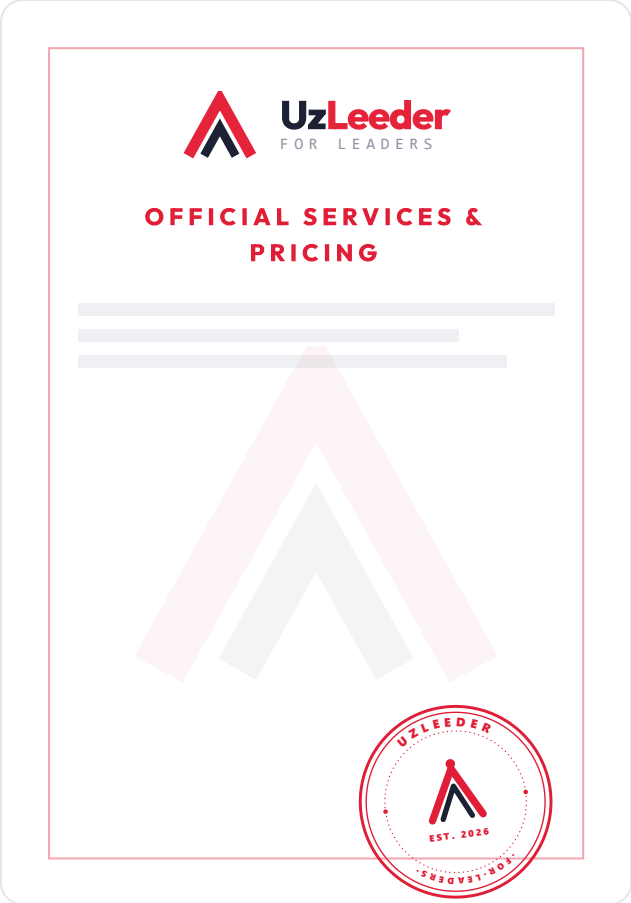

The core animation must not be redesigned. Only speed, smoothness and accessibility may improve.

Everywhere else

- Short, calm transitions (200–600 ms, ease-out).
- Motion explains state; it is never decoration.
- "Reduce motion": the intro shows the still logo and READY, then opens.

13 · DOCUMENTS

Documents

Layout

- Header: primary lockup, centred.
- Title in spaced uppercase, Red · light theme.
- Thin red inner frame 20 px from the edge.
- Watermark: the Λ mark, very light, in the centre.
- Signature bottom left, stamp bottom right (−8°).
- Serif body (Georgia) for formal text; Segoe/Manrope for tables.

Co-branding

With a client (for example UzLeeder × Shokirov) both logos sit side by side at equal visual weight, separated by "×". The client keeps its own colours.

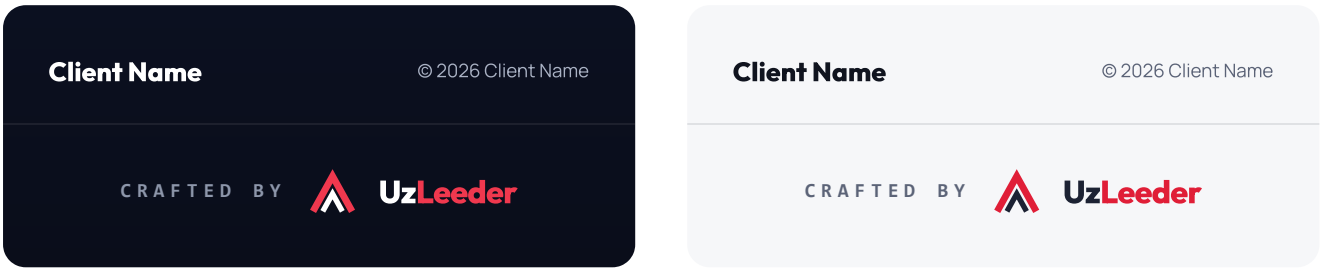

Always Bold Red

Documents never follow website templates: logo, accent, watermark and stamp stay in the original Bold Red identity.

14 · SIGNATURE

Digital signature — Crafted by UzLeeder

The signature at the very bottom of every website UzLeeder builds. It replaces the old crown badge and uses the Λ mark.

Dark sites · light sites (sample client footers)

Anatomy

- **CRAFTED BY** — monospace, 11 px, uppercase, tracking .28em, muted colour.
- **Λ mark** — 22 × 20 px, the standard two strokes (7 / 5.5).
- **Wordmark** — Outfit 800, 17 px: **Uz** in ink (white on dark) + **Leeder** in red.
- Gap 12 px, centred, 14 px above and below. Small size: 9.5 / 18 × 16 / 14 px.
- **Motion** — at rest only the Λ sways around its base (2.8 s loop); "CRAFTED BY" stays still. On hover or focus the wordmark types, like the intro: `<UzLeeder>` → `<LeeCodes>` → `<Max's Code>`; leaving returns it to the wordmark. Reduce motion: no waving, no typing.

	DARK SITE	LIGHT SITE
"Crafted by"	`#8E97AB`	`#5B6377`
"Uz" · inner Λ	`#FFFFFF`	`#1C2233`
"Leeder" · outer Λ	`#F0384E`	`#E01E37`

How to add it

One line in the site's footer (recommended):

```
<script src="https://uzleeder.vercel.app/crafted.js" defer></script>
<uzleeder-crafted theme="dark"></uzleeder-crafted>
```

`theme` dark · light · auto — `align` center · start · end — `size` md · sm — `fonts="none"` skips the Outfit subset. It renders in its own Shadow DOM, so the site's CSS cannot change it. A script-free HTML version is on `/brand/crafted-by.html`.

Rules

✓ Only on websites UzLeeder really built — for client sites, agreed in the contract or with the client.

✓ Small, at the very bottom of the footer: it signs the work, it does not advertise.

✓ Links to uzleeder.vercel.app; no cookies, no tracking.

✗ No crown, no recolouring, no other logo in its place.

Not the same as the project signature

The Workspace project signature (UZLEEDER · PROJECT COMPLETED / READY FOR DEPLOYMENT / DEMONSTRATION · PROJECT ID · SALAAM NEW ERA.) is an internal delivery mark on a project record. "Crafted by UzLeeder" is the public signature on a live website. Neither is a certification.

15 · VOICE

Voice & copy

Tone

Confident · technical · clear · human · calm · ambitious. A builder who understands business — not a marketing template.

Prefer

- ✓ “Real products. Real engineering.”
- ✓ “AI-assisted development.”
- ✓ “Designed, directed, validated, shipped.”
- ✓ Concrete facts: what it is, who it is for, what it does.

Avoid

- ✗ “Revolutionary”, “world-class”, “industry-leading”, “passionate developer”.
- ✗ Invented clients, numbers, reviews or guarantees.
- ✗ Promising perfect AI or unlimited free work.

AI team — how to talk about it

- **Max** — Founder & CEO, the human decision-maker.
- **Claude** — **Chief Architect** (an AI workflow role).
- **Codex** — AI Coding Engineer; other tools only in roles they really play.
- Always add: AI systems are part of Max’s AI-assisted workflow — not employees or owners.

Numbers

Only verified product data (for example 5,653 exercises, 31 topics, 1,100+ airlines) — labelled as product data, never as revenue or results.

Prices

Always “from $…”, with the final price fixed in the agreed scope.

16 · LANGUAGES

Languages

LANGUAGE	ADDRESS	DIRECTION	ROLE
English	/en	LTR	International buyers, default
O'zbek	/uz	LTR	Primary market
Русский	/ru	LTR	Regional buyers
فارسی	/fa	RTL	Kept for existing audience
العربية	/ar	RTL	Kept for existing audience

Rules

- The logo, “FOR LEADERS” and “SALAAM NEW ERA” stay in Latin letters.
- Right-to-left pages mirror the layout; icons with direction flip.
- Buyer-friendly words, no developer jargon in sales copy.

Translation status

Uzbek, Russian, Persian and Arabic texts should be reviewed by a native speaker before major campaigns.

17 · FILES

Asset files

All files are in the project folder `brand/` and online at `uzleeder.vercel.app/brand` — SVG (any size) and PNG.

FILE	WHAT	PNG SIZE
`logo-lockup.svg`	Λ + UzLeeder + FOR LEADERS, for light backgrounds	1320 × 384
`logo-lockup-dark.svg`	The same on a dark tile	1320 × 384
`logo-mark.svg`	Λ mark, colour	512
`logo-mark-white.svg`	Λ mark, white	—
`logo-mark-mono.svg`	Λ mark, one colour	—
`icon.svg`	App icon / favicon tile	512
`emblem.svg`	Official round emblem	1024
`emblem-stamp.svg`	Document stamp, transparent	1024
`og-image.png`	Social media preview	1200 × 630
`apple-touch-icon.png`	Phone home-screen icon	180
`/crafted.js`	“Crafted by UzLeeder” website signature (embed)	—
`crafted-by.html`	Signature previews, embed code and plain HTML	—

Each template has its own folder: bold-red, navy-gold, emerald, royal, ocean, sunset, mono.
